Our Style

1 Color Palette — Lavender Haze & Lime

Our thesis palette. Lavender for our models, lime for primary baselines, peach for secondary baselines, steel gray for neutrals.

Role	Name	RGB	Usage
Primary	Lavender	(166, 148, 232)	Our model bars, lines, boxes
Primary dark	Dark Lavender	(90, 72, 160)	Borders on primary elements
Secondary	Lime	(171, 204, 110)	Baseline 1
Secondary dark	Dark Lime	(95, 130, 40)	Borders on baseline 1
Tertiary	Peach	(241, 184, 144)	Baseline 2
Tertiary dark	Dark Peach	(180, 110, 60)	Borders on baseline 2
Neutral	Steel Gray	(102, 112, 130)	Neutral elements, eval boxes
Background	Lavender Paper	(249, 247, 252)	Backgrounds
Text	Dark Plum Ink	(45, 42, 60)	Labels, axes
Table sep	Light Lavender	(220, 218, 240)	Table group headers

2 Tables

All tables: `booktabs`, `\small` font, no vertical rules, `siunitx` S-columns. Bold best, underline second-best. Table separators use `TableSep` (light lavender).

2.1 Style A1 — Simple results table

Model	F1	Precision	Recall
CamemBERT	70.50	70.12	70.89
DrBERT	69.30	68.75	69.86
CamemBERT-bio	73.03	72.97	73.09

Table 1: **Style A1** — Simple results table.

2.2 Style A2 — Multi-group comparison

Model	Clinical		Biomedical	
	CAS1	E3C	EMEA	MEDLINE
Baselines				
CamemBERT	70.5	67.6	74.1	65.7
DrBERT	69.3	66.0	72.9	60.1
Our Models				
CamemBERT-bio	73.0	69.9	76.7	68.5

Table 2: **Style A2** — Multi-group with colored section headers.

2.3 Style A3 — Full comparison with footnotes

Model	Clinical NER			Biomedical NER		
	CAS1	CAS2	E3C	EMEA	MEDLINE	Avg.
General-domain						
CamemBERT	70.5	67.6	67.4	74.1	65.7	69.1
Biomedical-domain						
DrBERT [†]	69.3	63.8	66.0	72.9	60.1	66.4
AliBERT	68.1	61.4	64.5	71.2	58.3	64.7
Ours						
CamemBERT-bio	73.0	67.6	69.9	76.7	68.5	71.1

[†] Trained on private clinical data.

Bold indicates best result per column.

Table 3: **Style A3** — Full comparison with footnotes.

3 Bar Charts

Flat bars, open axes (left+bottom), dashed y-grid, legend below, value labels when space allows. Thin borders matching palette dark variants. All use `thesis bar` preset.

3.1 Style A — Single series, value labels

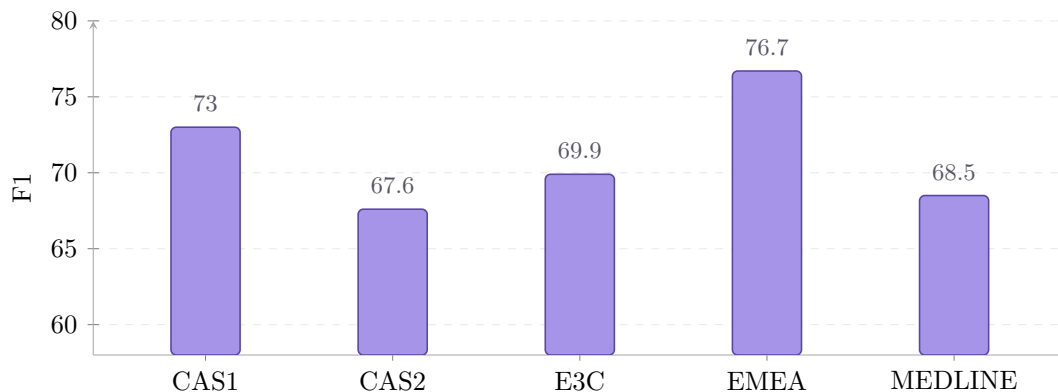

Figure 1: **Style A** — Single series with value labels.

3.2 Style B — Two series (ours vs baseline)

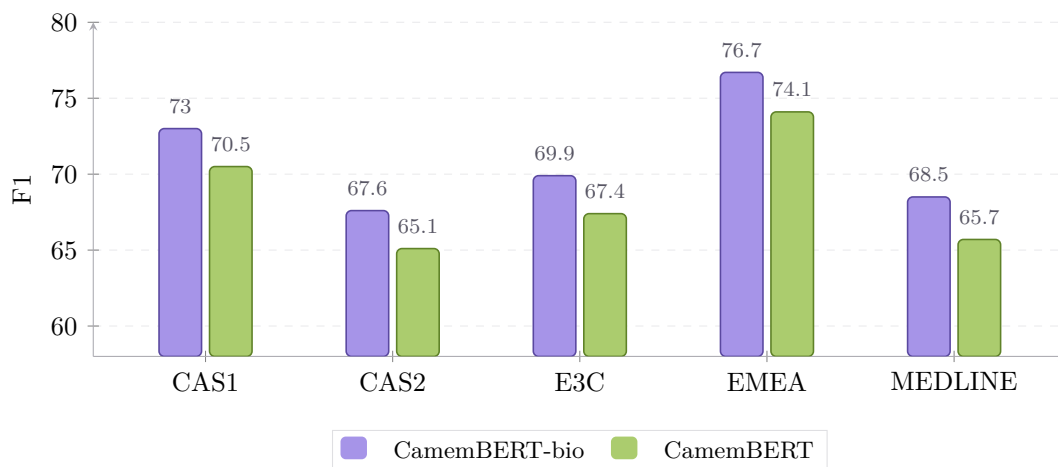

Figure 2: **Style B** — Two series with value labels and legend.

3.3 Style D — Two series with error bars ($\pm$ std)

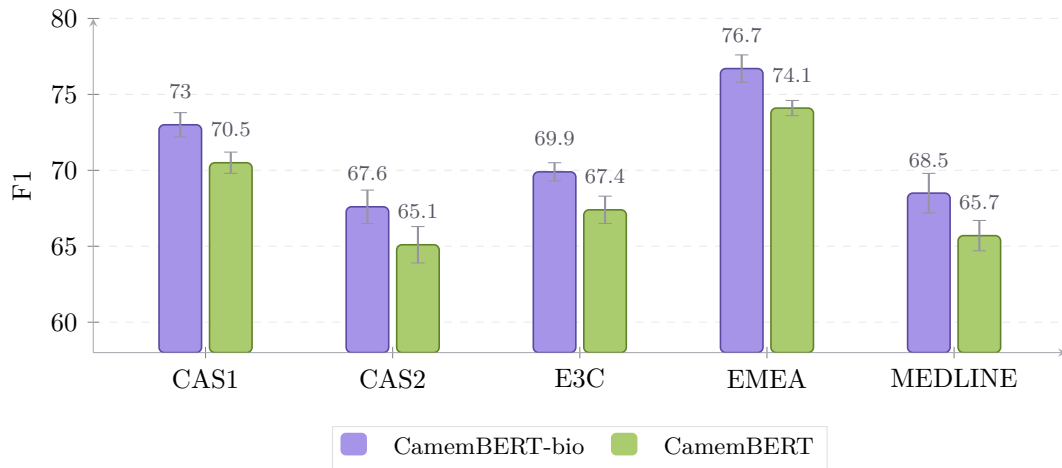

Figure 3: **Style D** — Two series with error bars ($\pm$ std).

4 Line Plots

Same visual language as barplots: open axes, dashed y-grid, legend below, palette-matched colors with dark borders on markers. Our model gets a thicker line (2.5pt) + confidence band; baselines are thinner (1.5pt) with distinct dash patterns. Markers have visible dark borders matching the bar chart treatment.

4.1 Style A — Markers with bordered fills

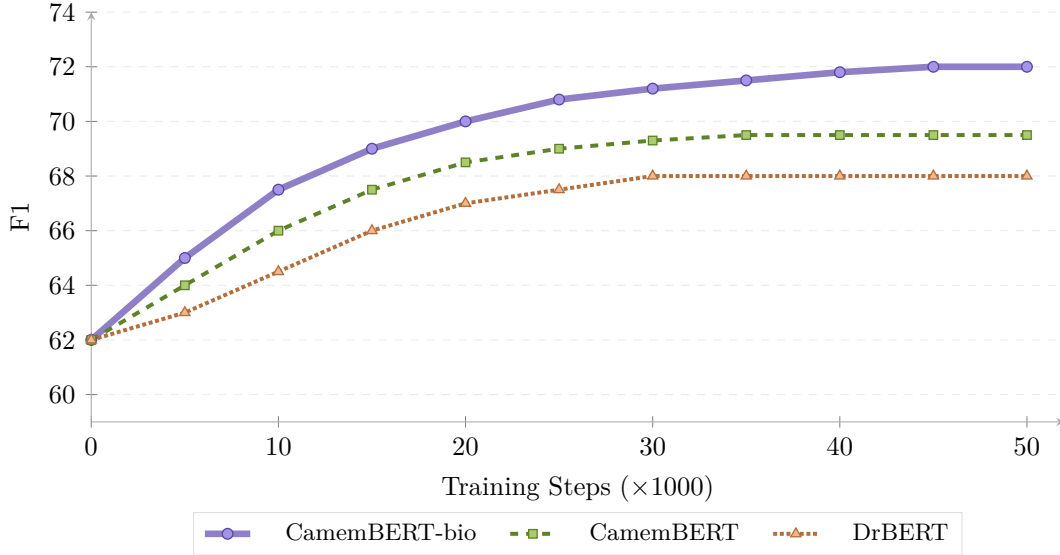

Figure 4: **Style A** — Bordered markers matching bar chart borders. Thicker line + circle for our model; dashed/dotted + square/triangle for baselines.

4.2 Style B — Markers + confidence band on our model

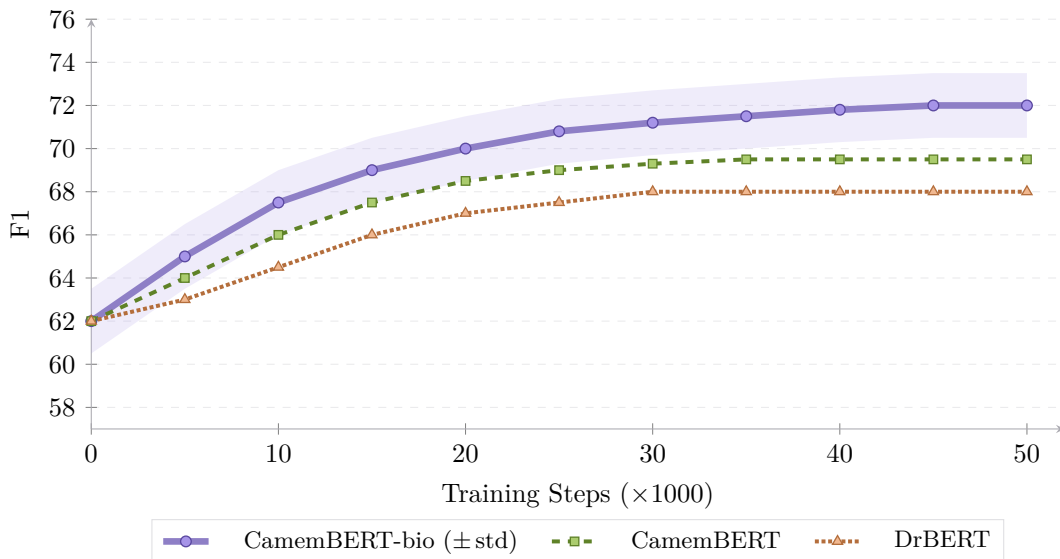

Figure 5: **Style B** — Same markers as A, plus confidence band ($\pm$ std) on our model only.

5 Pipeline / Architecture Diagrams

Same palette: lavender for our model/result, lime for input data, peach for processing, steel gray for evaluation. Rounded corners, thin borders, metadata annotations below.

5.1 Style A — Horizontal, color-coded stages

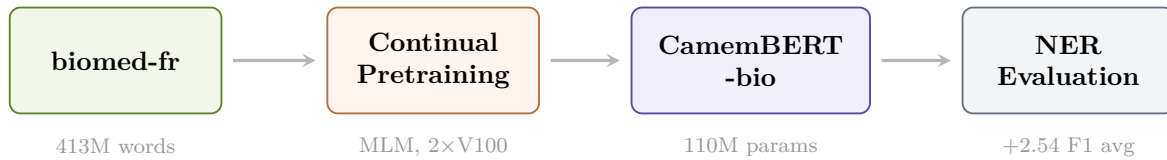

Figure 6: **Style A** — Horizontal pipeline. Input (lime), process (peach), result (lavender), evaluation (gray).

5.2 Style B — Vertical with branching

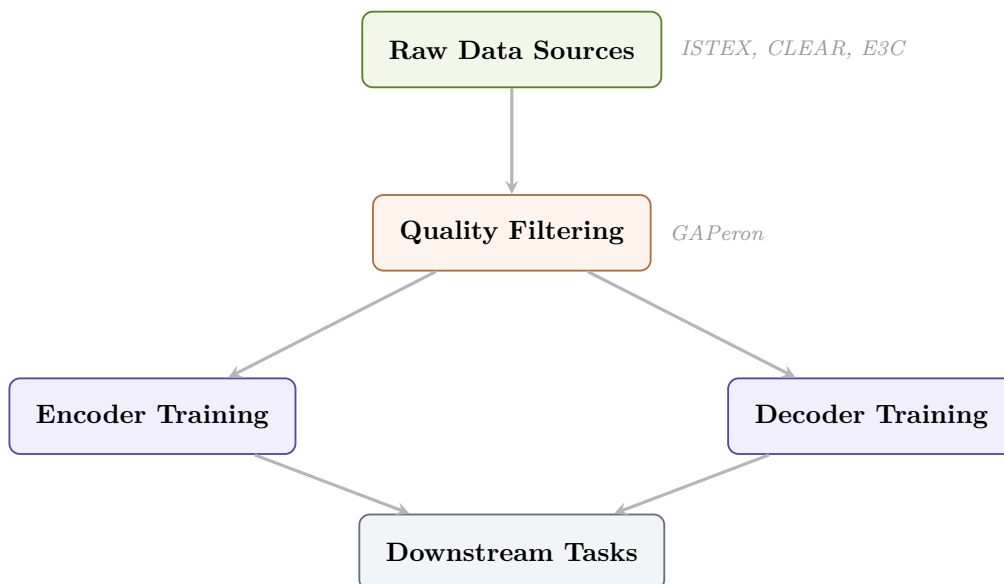

Figure 7: **Style B** — Vertical fork pipeline. Color-coded by role.

6 Summary — Validated Choices

Palette: Palette 4 — Lavender Haze & Lime (Section 1)

Tables: Style A with lavender separators (Section 2)

Bar charts: A (single), B (two series), D (error bars) (Section 3)

Line plots: A (markers) and B (markers + confidence band) (Section 4)

Pipelines: A (horizontal) and B (vertical fork) (Section 5)

Design rules across all figures:

- Open axes (left + bottom only), axis color `Ink!40`
- Dashed y-grid (`Ink!10`, `dashed`), no x-grid
- Legend below plot, centered, with `column sep=8pt`
- Serif font throughout (matching thesis body)
- Markers with visible dark borders (like bar chart border treatment)
- Our model: thicker lines/bolder presence; baselines: thinner, dashed/dotted
- PDF vector output only

Archive — Rejected Styles

Styles considered but not selected. Kept here for reference.

7 Rejected Bar Chart: Style C — Three series (no value labels)

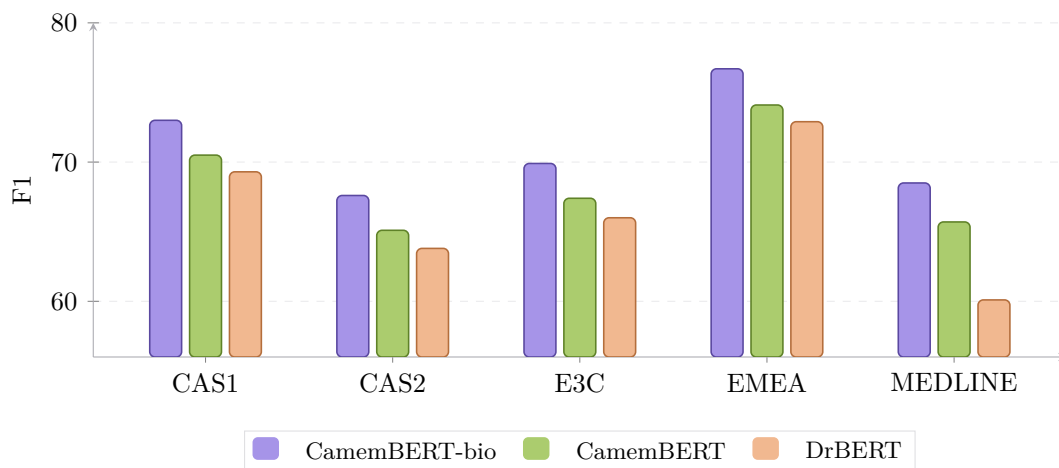

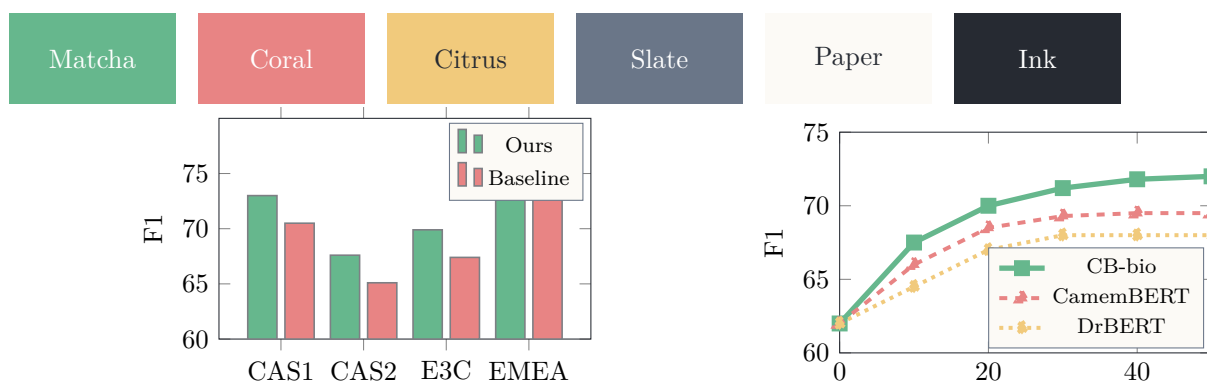

Figure 8: [Rejected] Style C — Three series, no value labels. Too crowded for value annotations.

8 Rejected Palettes

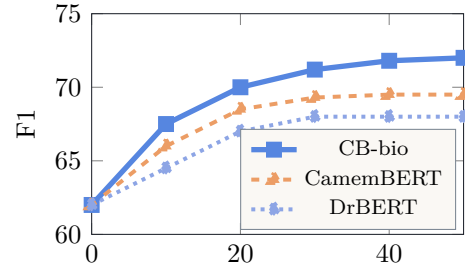

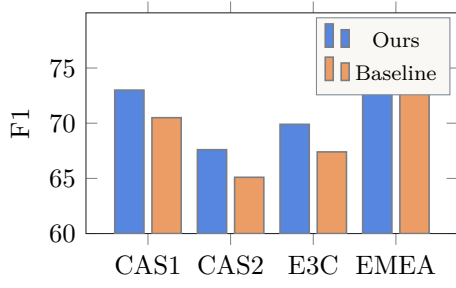

Alternative palettes that were not selected. Shown with mini bar + line charts.

8.1 Palette 1 — Matcha Pop & Coral Punch

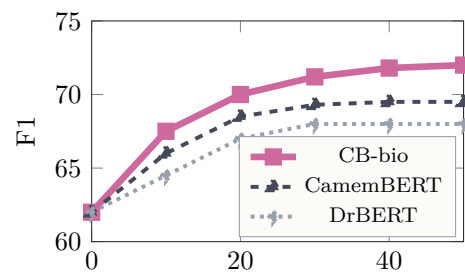

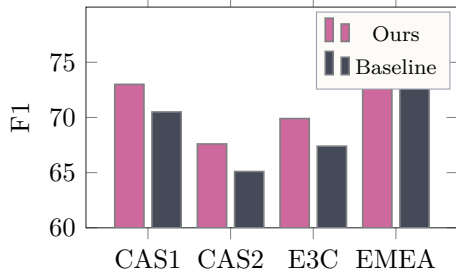

8.2 Palette 2 — Skyline Blue & Tangerine

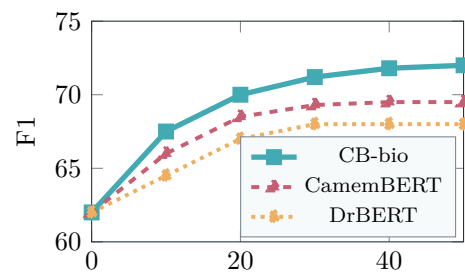

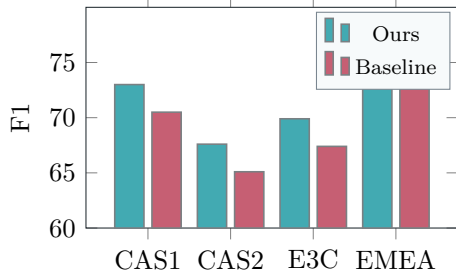

8.3 Palette 3 — Bubblegum & Graphite

8.4 Palette 5 — Aqua Neon & Cherry

8.5 Palette 6 — Electric Mint & Mocha Chrome
